

## RECOMMENDATION LETTER

Recommendation for Security Assessment Team – SLIIT City Uni Students

Date: 9th June 2025

To Whom It May Concern,

It is with great satisfaction that the State Timber Corporation endorses the student team from the **Sri Lanka Institute of Information Technology (SLIIT) City Uni** who carried out an extensive **Security Vulnerability Assessment** on our organization, as part of their academic requirement for the module **Computer Security (IT1209)**.

The student team **M. H. A. Ahmedh, I. U. Jayasinghe, A. H. Yapa, P. K. A. Gayanadee, U. H. T. Sithesh**, and **S. T. Moraes** displayed outstanding professionalism, technical skill, and adherence to ethical standards throughout the assessment. Their work was conducted under proper authorization and with minimal disruption to our daily operations.

The scope of the assessment included:

- Operational Security: Identifying issues such as a lack of network segmentation, outdated antivirus deployments, and the absence of a formal incident response plan.
- Physical Security: Highlighting concerns like broken or missing CCTV coverage and unrestricted access to premises.
- Management Security: Addressing outdated policies, lack of employee training, and the absence of a disaster recovery plan.

The team provided a comprehensive report with clear short-term and long-term recommendations aligned with national standards and cybersecurity best practices. Their findings have proven valuable to our strategic IT planning and future infrastructure upgrades.

We highly appreciate their professionalism and diligence, and we recommend them without reservation for any future academic, internship, or industry engagement.

Sincerely,

Deputy General Manager

M. A. C. N. Samarasinghe

State Timber Corporation
